Partner Datasheet
Scalable. User-Friendly. Flexible.

Designed for MSPs, MSSPs, vCISOs, and Red Teams, CanIPhish delivers ultra-realistic phishing simulations and security training that seamlessly integrate into your commercial offering.

With features like our conversational phishing engine (powered by Generative AI), CanIPhish boosts your offerings and helps you attract a broader customer base—without the complexity and high costs of legacy platforms.

White-Labeled Platform
Use your own domain, logos and banners, hiding any reference to CanIPhish. This Enterprise feature is offered to partners at no cost.

Seamlessly Scale
Manage your customers from a single tenant or create multiple with the ability to synchronize or switch between them as needed.

Partner Pricing
Along with volumetric discounting, our partners receive an additional discount off retail pricing on all subscriptions (enquire for details).

Customer Management Dashboard
Manage all your customers with an intuitive dropdown menu that allows you to quickly onboard customers and switch between tenants seamlessly.

Enterprise Functionality
Gain access to exclusive features usually only available to Enterprise subscriptions including white labelling and premium support.

Simple Billing
Purchase a subscription for your customers and charge them at your discretion. We offer separate billing for each tenant or aggregated billing options. (enquire for details).

How Much Does It Cost?

Our guiding principles are scalability and simplicity, and these values are deeply embedded in our partnership model. **There are no additional costs** beyond regular subscription fees.

We're committed to offering a powerful, cost-effective, and fully equipped solution unencumbered by hidden costs and unnecessary commercial complications.

> Guided by scalability and simplicity, our partnership model ensures a powerful, cost-effective solution without hidden fees or complications.
